

FINAL EXAM

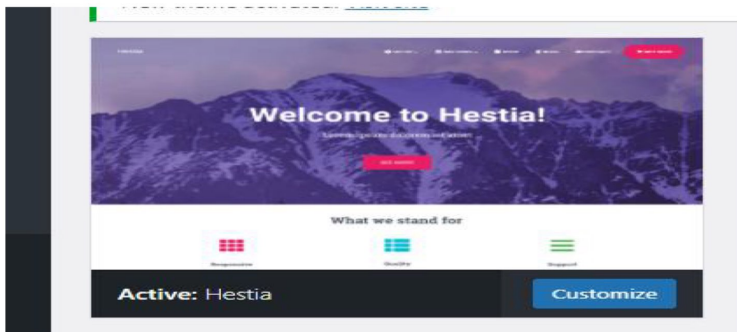

1. Create a wordpress project using MAMP.

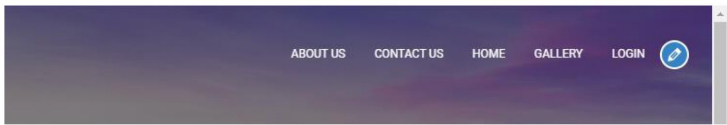

2. Open the testsite to verify it is loading with default settings.

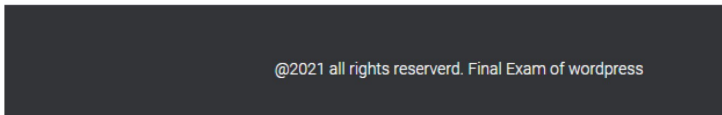

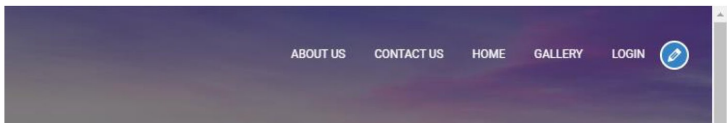

3. Create a custom theme and activate it.

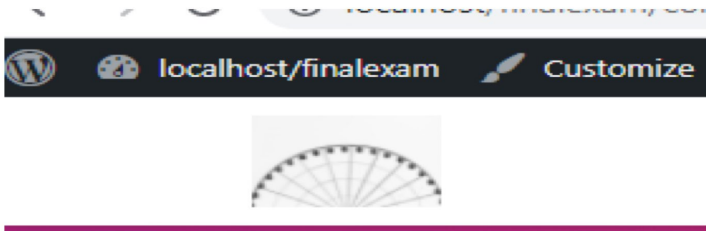

5. Create three pages namely Home, About US and Contact US.

6. All the pages should have a header, footer respectively.

7. Give a logo to your page and integrate it.

8. Create atleast two categories for your page's posts.

Add New Category

Name:

The name is how it appears on your site.

Slug:

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Parent Category:

Categories, unlike tags, can have a hierarchy. You might have a Jazz category, and under that have children categories for Bebop and Big Band. Totally optional.

Description:

Bulk Actions: 3 items

<input type="checkbox"/>	Name	Description	Slug	Count
<input type="checkbox"/>	Exam	—	exam	0
<input type="checkbox"/>	Final exam	—	final-exam	0
<input type="checkbox"/>	Uncategorized	—	uncategorized	7

Bulk Actions: 3 items

Deleting a category does not delete the posts in that category. Instead, posts that were only assigned to the deleted category are set to the default category (Uncategorized). This default category must be deleted.

9. Have the 5 major template files integrated to your project.

There five template files for my project/final exam

Pages

10. Change the homepage setting.

11. Edit the theme file by adding a custom css. Change atleast three different css properties.

```
35 =====*/
36 .header-four .header-t {
37     /*background: rgba(228, 191, 182, 0.1);*/
38     background-color: rgba(126, 128, 126, 0.7);
39 }
40
```

12. Add a thumbnail by using hooks.

13. Enable pagination for your posts. (Have 20 posts to test this).
